Let's get into the details of these amazing headphones and see why they're worth it.

The Best of the Best: Headphones on Amazon

I've tried out and researched the best headphones on Amazon right now—here are my top picks.

1). [Sony WH-1000XM4](#) (\$348 - \$349.99) – Best Overall

- **Ambient sound modes:** Noise canceling, transparency mode
- **Weight:** 254 grams
- **Battery life:** 30 hours per charge
- **Charge time:** 3 hours
- **Connectivity:** Bluetooth 5.0, NFC
- **Charge port:** USB-C

Why I Think It's Great

I've been using the Sony WH-1000XM4 headphones for my travels, and they have been incredible.

I first took them on a long flight, and the noise cancelation was so good it felt like I was in my own quiet bubble. No more engine noise or chatter from other passengers—just pure, uninterrupted peace.

One of the features I love the most is the **"Speak-to-Chat."** It's super handy when you need to talk to someone quickly.

The headphones pause your music automatically when you start talking, so you don't have to take them off.

Then there's the **"Quick Attention"** mode.

All you need to do is cover the right ear cup, and the volume lowers instantly, making it easy to hear announcements or have a quick conversation.

The sound quality is amazing. The rich bass, clear mids, and crisp highs make every sound great. Thanks to Sony's LDAC codec, the audio is high-resolution and really brings my music to life.

With a battery life of up to 30 hours, these headphones last through long trips without needing a recharge.

And if I'm in a hurry, a quick 10-minute charge gives me up to five more hours of playback.

Plus, I love that I can connect to two devices at once, making it easy to switch between my phone and laptop.

These headphones have truly made my travel experiences much more enjoyable.

Pros

- **Amazing Noise Cancellation:** Blocks out background noise well.
- **Long Battery Life:** 30 hours of use, with quick charging for extra convenience.
- **Comfortable Fit:** Lightweight and soft ear pads for long-term comfort.
- **Amazing Features:** Speak-to-Chat, Quick Attention, and multi-device pairing for easy use.

Cons

- **Not Water-Resistant:** Not suitable for wet conditions.
- **Pricey:** They're expensive, but worth it for the quality.
- **Speak-to-Chat Sensitivity:** Can sometimes be too sensitive, pausing music unintentionally.

Overall, the Sony WH-1000XM4 headphones are the best out there.

They offer fantastic noise cancellation, great sound quality, and long battery life, making them the ideal companion for any journey.

2). [Bose QuietComfort 35 II](#) (\$129.99 - \$425)) - Best Noise-Cancelling

Bose QuietComfort 35 II
Wireless Bluetooth
Headphones, Noise-
Cancelling, with Alexa Voice
Control - Black

Color:Black

- **Ambient sound modes:** Noise canceling
- **Weight:** 240 grams
- **Battery life:** 20 hours (Bluetooth and ANC), 40 hours (wired with ANC)
- **Charge time:** 2.5 hours for a full charge, 15 minutes for 2.5 hours of playback
- **Connectivity:** Bluetooth 4.1, NFC

- **Charge port:** Micro-USB

Why I Think It's Great

I've been using the Bose headphones on my train journeys, and I must say they live up to their hype.

The noise cancellation is fantastic; it felt like I was in my own world, away from the noisy train cabin. It created such a calm and focused listening experience.

Comfort is a big plus with these headphones.

They are lightweight and have soft ear cushions that make my long train rides much more bearable. I wear them for hours without any discomfort.

The sound quality is impressive, with clear highs, balanced mids, and rich bass, making every genre of music sound amazing.

One feature I love is the built-in Google Assistant. It's so convenient to manage my music, get directions, and check my schedule just by talking to the headphones.

It makes multitasking so much easier. The Multi-device pairing is another handy feature. I can quickly switch between my phone and laptop.

Pros

- **Excellent Noise Cancellation:** Perfect for blocking out background noise during travel.
- **Very Comfortable:** Lightweight with soft ear cushions for long-term wear.
- **Great Sound Quality:** Balanced audio that makes all genres sound fantastic.
- **Handy Features:** Google Assistant and multi-device pairing make life easier.

Cons

- **Micro-USB Charging:** Uses the older Micro-USB port instead of the more modern USB-C.
- **Limited Touch Controls:** Lacks advanced touch controls found in some competitors.
- **Plastic Build:** While lightweight, the plastic build might feel less premium compared to metal alternatives.

Overall, these noise cancelling headphones are among the best travel headphones on Amazon. They combine excellent noise cancellation, great comfort, and superior sound quality, making them a great pick for any traveler.

3). [Anker Soundcore Life Q35 \(\\$99.99\)- Best Budget](#)

Soundcore by Anker Life Q35
Multi Mode Active Noise
Cancelling Bluetooth
Headphones with LDAC for Hi
Res Wireless Audio, 40H
Playtime, Comfortable Fit,...

Color:Blue

- **Ambient sound modes:** Indoor, outdoor, transport
- **Weight:** 267 grams
- **Battery life:** 40 hours with ANC on, 60 hours with ANC off
- **Charge time:** 2 hours for a full charge, 5 minutes for 4 hours of playback
- **Connectivity:** Bluetooth 5.0
- **Charge port:** USB-C

Why I Think it's Great

The Anker Soundcore Life Q35 headphones are perfect for those who want great travel headphones without spending too much.

I started using the Anker Soundcore Life Q35 headphones two years ago, and these on ear headphones offer effective noise canceling with three modes tailored to different environments.

They have memory foam ear cups that fit snugly and block out background noise well. Plus, they support the LDAC codec, ensuring high-resolution audio quality over Bluetooth.

One of the best parts?

The incredible battery life. With up to 60 hours of playtime without ANC, I could go days without needing to charge.

Even with ANC on, you still get a solid 40 hours. If you're in a pinch, a quick 5-minute charge gives you 4 hours of playback.

They also include an airplane adapter and a headphone jack, so you can easily switch to wired mode if needed, making them perfect for in-flight entertainment.

Pros

- **Long Battery Life:** Up to 60 hours of playtime with ANC off, ideal for long journeys.
- **High-Resolution Audio:** LDAC support for crystal-clear sound over Bluetooth.

- **Comfortable Fit:** Memory foam ear cups and headband for all-day comfort.

Cons

- **Mediocre ANC Performance:** The noise canceling is good but not top-tier.
- **Plastic Build:** The mostly plastic construction might not feel as premium.
- **Limited Color Options:** Comes in a limited range of colors.

If you don't want to spend a lot, consider the Anker Soundcore Life Q35 headphones. They offer great sound quality, exceptional comfort, and long battery life, making them a fantastic choice for any traveler.

4). [Sennheiser PXC 550-II \(\\$329.93\)](#) - Best Sound, Over-Ear

SENNHEISER PXC 550-II
Wireless NoiseGard Adaptive
Noise Cancelling, Bluetooth
Headphone with Touch
Sensitive Control and 30-Hour
Battery Life, Black

Style:New Model

- **Ambient Sound Modes:** Adaptive Noise Cancellation, Transparency mode
- **Weight:** 227 grams
- **Battery Life:** Lasts up to 20 hours with Bluetooth and ANC on and up to 30 hours with ANC only in wired mode
- **Charge Time:** Takes around 3 hours to fully charge
- **Connectivity:** Bluetooth 5.0
- **Charge Port:** USB Micro-A to Micro-B

Why I Think It's Great

I recently took the Sennheiser PXC 550-II headphones on a long flight, and to be honest, it exceeded my expectations as I previously was using the old model.

But as soon as I put them on, the advanced ANC technology kicked in, drowning out the airplane noise. The sound quality was incredible – rich and detailed, just like I love it.

The headphones are so comfortable and lightweight that I almost forgot I was wearing them, even during the long listening sessions.

The touch controls on the ear cups make it easy to manage my music and calls without fumbling around.

These headphones adapt perfectly whether I'm on a bus or in a quiet room.

Pros

- **Balanced Sound:** Delivers clear, detailed audio across all frequencies, perfect for all music genres.
- **Adaptive Noise Cancellation:** Automatically adjusts to provide the best noise reduction wherever you are.
- **Comfortable Design:** Lightweight with plush ear cups, great for long listening periods.
- **Easy Controls:** Touch-sensitive controls on the ear cups help manage music and calls.

Cons

- **Micro-USB Charging:** These headphones use the older Micro-USB port for charging rather than the newer USB-C.
- **Touch Controls Sensitivity:** The touch controls can be finicky and may take some time to get used to.
- **Limited Bass:** Bass lovers might find the low-end a bit lacking compared to other headphones.

If you want over-ear headphones with great sound quality and strong noise cancellation, the Sennheiser PXC 550-II is a fantastic choice.

These headphones offer a perfect mix of performance and comfort, making them ideal for travelers and audio professionals.

5). [Apple AirPods Max](#) ((\$449.99, normally \$549) - Most Comfortable, Over-Ear

Apple AirPods Max Wireless Over-Ear Headphones, Active Noise Cancelling, Transparency Mode, Personalized Spatial Audio, Dolby Atmos, Bluetooth Headphones...

Color: Space Gray

Set: Without AppleCare+

- **Ambient Sound Modes:** Active Noise Cancellation and Transparency mode
- **Weight:** 385 grams
- **Battery Life:** Up to 20 hours with noise canceling or Transparency mode
- **Charge Time:** Around 2 hours for a full charge
- **Connectivity:** Bluetooth 5.0
- **Charge Port:** Lightning

Why I Think It's Great

When I first tried the Apple AirPods Max, I was blown away by their build quality and amazing audio performance. These headphones are built to last and feel incredibly premium.

The active noise cancellation (ANC) is among the best I've experienced, and it is perfect for blocking out all the ambient noise when I'm traveling.

The sound quality is superb, with custom-built drivers delivering balanced audio across all frequencies.

What really stood out to me was the unique Digital Crown for volume control – it's so precise and intuitive, making adjustments very easy.

Whether I'm listening to music or taking calls, the AirPods Max consistently provides an exceptional experience.

Pros

- **Superior Sound Quality:** Offers balanced, rich audio that's ideal for all types of music.
- **Excellent Noise Cancellation:** The ANC is highly effective at blocking out background noise.
- **Comfortable Fit:** The mesh canopy and memory foam ear cups provide long-lasting comfort.
- **Easy Integration:** Perfectly integrates with other Apple devices, enhancing the user experience.

Cons

- **Heavy Design:** At 385 grams, they are heavier than many competitors, which can be uncomfortable for extended wear.
- **Expensive:** They are priced higher than most other noise-canceling headphones.
- **No 3.5mm Jack:** Requires an additional purchase for a Lightning to 3.5mm audio adapter for wired listening.

If you're looking for a premium listening experience and you're already invested in Apple products, the AirPods Max is a fantastic choice.

They combine high-quality sound, effective noise cancellation, and a comfortable fit, making them worth considering despite the high price tag.

6). [Beats Studio3 Wireless](#) (\$169.95, normally \$349) - Best Multi-Use

Beats Studio3 Wireless Noise Cancelling Over-Ear Headphones - Apple W1 Headphone Chip, Class 1 Bluetooth, Active Noise Cancelling, 22 Hours of Listening...

Color:Matte Black

- **Ambient Sound Modes:** Pure Adaptive Noise Cancelling (Pure ANC)
- **Weight:** 260 grams
- **Battery Life:** Up to 22 hours with ANC on, up to 40 hours with ANC off
- **Charge Time:** About 2 hours for a full charge
- **Connectivity:** Bluetooth 4.0
- **Charge Port:** Micro-USB

Why I Think It's Great

I've used the Beats Studio3 Wireless headphones for a while now, and they are fantastic for their versatility and performance.

They have Apple's W1 chip, making it super easy to connect and switch between my Apple devices. The noise cancellation is great for blocking out background noise, perfect for when I'm working or traveling.

The battery life is impressive, too, offering up to 22 hours with noise cancellation on and up to 40 hours without it.

Plus, they look stylish and are comfortable to wear for long periods, making them my go-to headphones for everyday use.

Pros

- **Easy Apple Integration:** The W1 chip ensures quick pairing and smooth switching between Apple gadgets.
- **Long Battery Life:** Offers up to 22 hours with ANC on and 40 hours without it.
- **Comfortable Fit:** The plush ear cups and adjustable design make them comfy for long use.
- **Solid Build:** Durable materials and a sleek look make these headphones durable and stylish.
- **Effective Noise Cancellation:** Blocks out a lot of background noise, perfect for travel or work.

Cons

- **Micro-USB Charging:** The older Micro-USB port is still used instead of the more modern USB-C.
- **Ear Pads Can Get Warm:** The synthetic leather ear pads might make your ears sweat during extended use.
- **Limited Android Features:** Some features, like smooth device switching, work better with Apple devices than with Android.

Overall, the Beats Studio3 Wireless headphones are a great mix of style, comfort, and functionality.

They're great for listening to music, making calls, and blocking out noise when you travel. If you use Apple devices, you'll love how easily they connect and work together.

7). [Samsung Galaxy Buds Pro](#) (\$168.79, normally \$199.99) - Best Sound, Earbuds

- **Ambient sound modes:** Active Noise Canceling (ANC) and Ambient Sound mode
- **Weight:** 6.3 grams per earbud
- **Battery life:** 5 hours with ANC on, 18 hours with the charging case (ANC on); 8 hours with ANC off, 28 hours with the charging case (ANC off)
- **Charge time:** About 2 hours for a full charge; a quick 5-minute charge gives 1 hour of playtime.
- **Connectivity:** Bluetooth 5.0
- **Charge port:** USB-C, supports wireless charging

Why I Think It's Great

The Samsung Galaxy Buds Pro are fantastic in ear headphones that elevate your listening experience.

The sleek design and comfortable fit ensure they stay put without causing discomfort, even during long listening sessions.

What really sets these Bluetooth headphones apart is the sound quality. They offer a balanced sound with punchy bass, clear mids, and crisp highs.

Whether you're into classical music or heavy metal, these buds make everything sound great.

The touch controls are very easy to use, and the earbuds are IPX7-rated so that they can handle sweat and rain—ideal for workouts.

Pros

- **Effective Noise Canceling:** Top-notch ANC that keeps background noise out.
- **Water Resistance:** IPX7 rating means they can handle sweat and rain.
- **Great Sound Quality:** Balanced audio with deep bass and clear highs for all types of music.

Cons

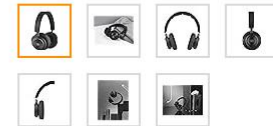

- **Battery Life:** Only up to 5 hours with ANC on, which is shorter than some other models.
- **Fit Issues:** Some users might find they need to adjust the ear tips frequently.
- **Price:** They are on the pricier side for wireless earbuds.

If you're on the hunt for some seriously good travel headphones on Amazon, the Samsung Galaxy Buds Pro should be on your radar.

8). [Bang & Olufsen Beoplay H9 \(\\$389\)](#) - Best Luxury

Bang & Olufsen Beoplay H9
3rd Gen Wireless Bluetooth
Over-Ear Headphones
(Amazon Exclusive Edition) -
Active Noise Cancellation,
Transparency Mode,...

- **Ambient sound modes:** Active Noise Cancelling (ANC)
- **Weight:** 285 grams
- **Battery life:** Up to 25 hours with ANC on, up to 32 hours with ANC off
- **Charge time:** Approximately 2.5 hours for a full charge
- **Connectivity:** Bluetooth 4.2 supports AAC and aptX codecs
- **Charge port:** USB-C

Why I Think It's Great

The Bang & Olufsen Beoplay H9 headphones are the epitome of luxury. With their high-quality leather and aluminum build, they feel just as premium as they look.

The active noise canceling (ANC) is incredibly effective, allowing you to immerse yourself in your music without distractions.

The sound quality is exceptional, featuring rich bass and crystal-clear highs that bring your favorite tracks to life.

Additionally, these headphones have replaceable parts, such as ear pads and battery packs, which add to their longevity.

Pros

- **Luxurious Design:** High-quality leather and aluminum for a premium feel.
- **Great Sound:** Rich bass and clear highs for amazing audio.
- **Comfortable Fit:** Soft ear cups and adjustable headband for long listening sessions.
- **Effective ANC:** Blocks out noise to keep you in your zone.
- **Replaceable Parts:** Ear pads and battery packs can be replaced.

Cons

- **Pricey:** More expensive than many other headphones.
- **Heavier:** A bit heavier, which might be less comfortable over time.
- **Older Bluetooth:** Uses Bluetooth 4.2, not the latest version.

If you're looking for the best travel headphones on Amazon, the Bang & Olufsen Beoplay H9 is worth considering.

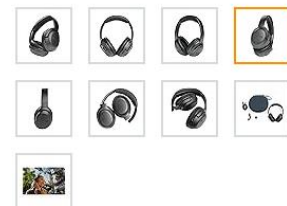

They combine luxury, comfort, and fantastic sound quality, making them perfect for anyone who wants a premium listening experience on the go.

9). [JBL Tour One](#) (\$144.99) – Best For Comfort

JBL TOUR ONE Wireless Noise Cancelling Bluetooth Headphones, Hi-Res Audio, Perfect Voice Clarity Phone Calls, up to 50H Battery, Google Assistant and Amazon...

Color:Black

- **Ambient sound modes:** Active Noise Cancellation (ANC) On, ANC Off, Hear-through
- **Weight:** 296 grams
- **Battery life:** Up to 36 hours with ANC on, up to 41 hours with ANC off
- **Charge time:** Approximately 2.5 hours for a full charge
- **Connectivity:** Bluetooth 5.0
- Charge port: USB-C

Why I Think It's Great

The JBL Tour One headphones are a great choice for travelers and music lovers alike.

These noise canceling headphones have adaptive noise canceling (ANC) that adjusts to your surroundings, offering an immersive listening experience whether you're on a busy street or a quiet plane.

With up to 25 hours of battery life with ANC on, you can enjoy long trips without needing to charge constantly.

The sound quality is top-notch, delivering balanced audio with deep bass, clear middle tones, and sharp, high notes.

The build is durable, and the soft leather-like padding(faux leather) on the ear cups and headband makes these headphones great for long listening sessions.

Pros

- **Long Battery Life:** Up to 50 hours of playtime with ANC off, great for extended use.
- **Adaptive Noise Cancelling:** Adjusts automatically to your environment, enhancing the listening experience.
- **Comfortable Fit:** Soft faux leather padding ensures comfort during long listening sessions.
- **Quick Charge:** A 10-minute charge gives you 2 hours of listening time.

Cons

- **Bulky Design:** These headphones are a bit bulky, making them less portable.
- **Limited Color Options:** Available only in black, which might not suit everyone's style.
- **Mediocre Touch Controls:** While generally effective, the touch controls can sometimes be less responsive.

The JBL Tour One headphones are perfect for anyone looking to upgrade their travel experience.

With great sound, impressive battery life, and smart noise canceling, they're ready for any adventure you throw at them.

Whether you're crossing continents or just commuting to work, these headphones make every journey more enjoyable.

10). [Jabra Elite 85h](#) (\$208.83) – Best For Battery life

Jabra Elite 85h Titanium Black
Bluetooth Noise-Canceling
Headphones, Over-Ear, 36-
Hour Battery Life, Water
Resistant, ANC, SmartSound,
Fast Charging

Color: Titanium Black

- **Ambient sound modes:** Active Noise Cancellation (ANC) On, ANC Off, Hear-through
- **Weight:** 296 grams
- **Battery life:** Up to 36 hours with ANC on, up to 41 hours with ANC off
- **Charge time:** Approximately 2.5 hours for a full charge
- **Connectivity:** Bluetooth 5.0
- **Charge port:** USB-C

Why I Think It's Great

The Jabra Elite 85h headphones are my go-to for long trips. On a recent cross-country flight, I didn't have to worry about recharging them even once.

From the moment I left my house to the moment I arrived at my destination, these headphones just kept going.

Even with active noise cancellation (ANC) turned on, they lasted the entire trip without needing a recharge.

These headphones are perfect for long journeys where you don't want to worry about running out of battery.

Pros:

- **Incredible Battery Life:** Up to 36 hours with ANC on and 41 hours without, perfect for long trips.
- **SmartSound Technology:** Automatically adjusts sound settings based on your surroundings.
- **Comfortable Fit:** Soft ear cups and headband make them comfortable to wear for hours.
- **Durable Design:** Water and dust resistance for added durability.

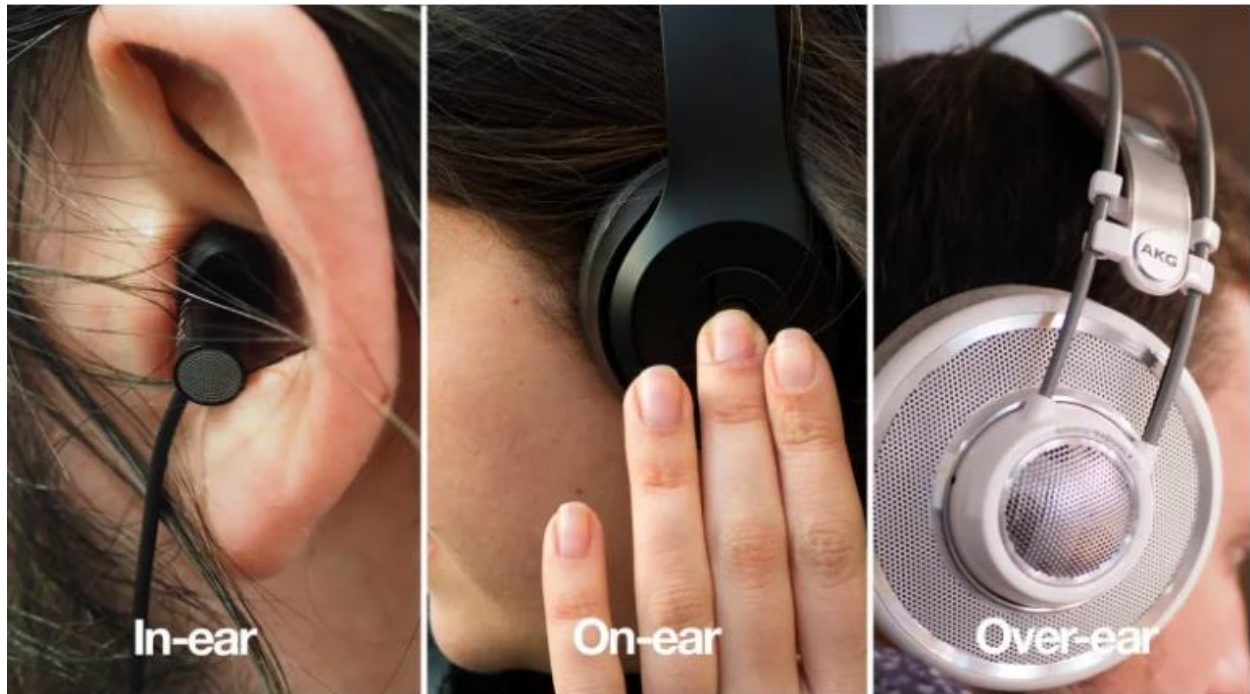

Cons:

- **Size:** They are a bit bulky, which can be a downside for portability.
- **Price:** A bit more expensive than some other options, but the features make it worth it.

The Jabra Elite 85h headphones are a great investment if you value battery life and smart noise-canceling features.

And the added durability ensures they can handle different environments. These headphones have made my travels much more enjoyable, and I highly recommend them for your next adventure.

What You Should Know About Headphones

You've probably seen all kinds of headphones, but knowing the basics can really help you pick the right pair.

Headphones generally come in three styles: in-ear, on-ear, and over-ear. Knowing these types can help you figure out what features you need and how much you should spend.

a). Style

First, let's talk about styles. In-ear headphones are small and portable, making them great for when you're on the go.

On-ear headphones rest on your ears, offering more comfort than in-ear ones while still being compact.

Over-ear headphones cover your whole ear, providing the best sound quality and comfort, though they are bulkier.

b). Bluetooth/Wireless

Thinking of going wireless? Bluetooth headphones are great because they let you move around without being tied down by wires.

True wireless earbuds, like the Apple AirPods Pro, are even more minimalist and super convenient for everyday use.

Nowadays, you can find Bluetooth headphones in many different styles and at prices that match your taste and budget.

c). Noise-Canceling

If you travel a lot or work in noisy places, noise-canceling headphones are a lifesaver. They reduce background noise, making your music or podcasts sound much clearer.

The Sony WH-1000XM4 is a great example, with excellent noise-canceling abilities. These headphones are fantastic for flights, commutes, or just noisy offices.

d). Battery Life

For long trips or extended listening, battery life is important. The Jabra Elite 85h, for example, offers up to 36 hours of playtime with noise cancellation.

This means you can go for a full day and more without needing a recharge, which is perfect for long flights or road trips.

e). Playtime and Charging

Quick charging is also very important. Some headphones, like the Jabra Elite 85h, can give you hours of use with just a quick charge. This is super handy when you're in a rush and need to top up quickly.

f). Connectivity

Check the connectivity options. Most modern headphones use Bluetooth 5.0, which gives a stable connection and good range.

You might also want ones that can connect to multiple devices at once, like switching between your phone and laptop easily.

g). Comfort and Durability

Comfort is key, especially if you're wearing headphones for long periods. Look for models with good padding and an adjustable headband.

Durability is also important—headphones like the Jabra Elite 85h come with a 2-year warranty against rain and dust, so they're built to last.

You can see that choosing the right headphones depends on how you plan to use them.

Whether you need something portable for the gym, noise-canceling for travel, or just a great all-rounder, there's a perfect pair out there for you.

Ready to Find Your Perfect Travel Headphones?

We've covered some fantastic options for travel headphones. The Sony WH-1000XM4 shines with its incredible noise canceling and 30-hour battery life, making it a top pick overall.

Bose QuietComfort 35 II is perfect for superior noise canceling and a comfy fit. For those on a budget, the Anker Soundcore Life Q35 offers great value with solid noise canceling and long battery life.

If you want top-notch sound, the Sennheiser PXC 550-II is excellent, while the Apple AirPods Max provides unmatched comfort and superb sound. The Beats Studio3 Wireless is versatile and stylish, perfect for all-around use.

Samsung Galaxy Buds Pro delivers excellent sound in a compact package, and for a touch of luxury, the Bang & Olufsen Beoplay H9 combines style and performance. The Jabra Elite 85h boasts outstanding battery life, perfect for long trips.

Now, it's time to pick the one that suits you best.

Think about what matters most to you—whether it's noise cancellation, battery life, or comfort. Head over to Amazon and find the perfect travel companion today!

Trust me, your travels will never be the same.
