

Teachable Review: Does It Beat the Rest?

"Check out my teachable review to discover if it's the right platform for launching your e-learning courses. Here's what I found out after trying it myself!"

Teachable is often praised as the best platform for selling online courses. After using it for a couple of years, I've got plenty to share about my experience.

When I first started, I just wanted a quick and easy way to get my course online. Teachable seemed like the perfect fit.

Over the years, I've tried Teachable, Udemy, Kajabi, Thinkific, and many more platforms to build my courses. And let me tell you, Teachable also has its pros and cons.

Here's why you should read this Teachable review: I have hands-on experience with the platform, and I keep track of any changes they make.

Teachable is simple and effective, but like any platform, it might not be the best fit for everyone.

But enough about that... Let's start the Teachable review!

Teachable Overview: My Honest Take on the Platform

[Teachable](#) has been a game-changer for me as an online course creator. It's an easy-to-use but powerful platform that lets you make and sell online courses, offer coaching sessions, sell digital products, and even run memberships—all from one place.

What I love about Teachable is how easy it is to use. I could create online courses without getting bogged down in technical details.

The drag-and-drop course builder made it very easy to upload videos, add quizzes, and organize my content.

Here are some key highlights:

- **Course Management:** Manage multiple courses under one account. This has been super helpful for me because I run several courses simultaneously.
- **Customization Options:** Customize your course pages to match your brand perfectly.
- **Customer Support:** Whenever I faced any issues, the Teachable team was quick to help, whether through email or live chat. This made a huge difference in my experience.
- **Payments:** Payments are straightforward on Teachable. They handle U.S. sales tax and EU VAT automatically if you use their payment gateways, which saved me a lot of trouble.

I'll go into more detail in the following sections, but for now, let's just say Teachable has made my life a lot easier.

Who Should Use Teachable? Is It Right for You?

Teachable is a great platform for many types of users. Here's a quick look at who can benefit the most from using this online learning platform:

a). New Course Creators

Just starting out with creating courses? Teachable is perfect for you. It has everything you need to get started, like video hosting, quizzes, and certificates. Also, the customer service team is always there to help if you get stuck.

b). Experienced Educators, Coaches, and Consultants

If you've been teaching online for a while or work as a coach or consultant, Teachable has advanced features that are perfect for you.

You can manage multiple courses, customize your course pages to match your brand, and create an easy experience for your students.

Additionally, you can offer coaching services, run memberships, and sell digital products. The flexibility of Teachable makes it a great choice for all your teaching and coaching needs.

c). Online Business Owners and Small to Medium-Sized Businesses

Whether you run an online business or a small to medium-sized business, Teachable is a fantastic tool to help you create courses and sell them.

It's super easy to use, so you can focus on teaching and growing your business without worrying about tech problems.

Plus, it supports unlimited students and multiple courses, making it perfect for expanding your online offerings and scaling up your business.

d). Tech-Expert Entrepreneurs

Love using different tools in your workflow? Teachable integrates with apps like [ConvertKit](#), [Zapier](#), and [Google Analytics](#). This makes it easy to manage your marketing and track your success.

e). Non-Techies

Not great with tech? No problem. Teachable's interface is simple, and they offer excellent support. You can build and manage your courses without needing to know a lot about technology.

Teachable is a versatile platform that suits a variety of users, from beginners to experienced educators and business owners.

Its ease of use, powerful features, and great support make it a top choice for creating and selling online courses.

Now, let's look at key teachable features in detail and see if it truly beats the rest!

Key Features That Kept Me Using Teachable

Teachable has been my go-to platform for creating and selling online courses. Over time, I've found several features that have truly made a difference in my journey.

Here's a look at the standout features that have kept me hooked on the Teachable platform and why it might be perfect for you, too.

Feature #1: AI-Powered Tools

Teachable's AI tools have made creating courses so much easier and more efficient for me.

a). AI Course Outline Wizard

The screenshot shows the 'Create your course outline' interface in Teachable. On the left is a dark sidebar with navigation links: Users, Site, Sales, Emails, Settings, PRODUCTS (with a plus icon), Courses, PRODUCTS (with a plus icon), and Courses. The main content area is titled 'Create your course outline' and includes a sub-header: 'This information will be used by our AI tool to create your curriculum, lesson content and sales page.' Below this is a 'Course title' input field containing the text 'How to Avoid Common SEO Mistakes in Content Writing'. Underneath is a 'Describe your course' text area containing a paragraph about writing content for a website and avoiding SEO mistakes. At the bottom of the main area is a green button with a star icon and the text 'Generate your outline'. A red arrow points from the text area to this button.

Creating a course can be overwhelming, especially when you're unsure how to start. Teachable's [AI Curriculum Generator](#) has been a lifesaver.

I just type in a brief description, and it generates a detailed course outline in seconds. This tool saved me countless hours and gave me a solid foundation for my courses.

For example, when I created my first course on the platform, the AI tool helped me organize my thoughts and structure the content logically, which received positive feedback from my students for its clarity.

b). AI-Powered Quizzes

Keeping students engaged can be a challenge. That's where the [AI Quiz Generator](#) comes in.

This feature quickly generates quizzes from my course content, making it easy to keep students engaged and assess their understanding.

It's been a huge time-saver and a fantastic way to ensure my students are learning effectively. One of my students mentioned that the quizzes helped them retain information better and stay motivated throughout the course.

c). Instant Lesson Summaries

Sometimes, students need a quick recap. The AI Summary Generator creates concise summaries of lessons and sections automatically.

This feature has been incredibly useful for providing my students with the key takeaways, helping them retain the most important points from each lesson.

After using this feature, I noticed a significant improvement in my student's ability to recall and apply the course material.

d). AI Subtitles & Translations

Creating subtitles for my videos was always a problem until I started using Teachable's AI Subtitles & Translations feature.

It automatically generates subtitles when I upload a video, saving me time and money.

This feature makes my content more accessible to a global audience, enhancing the learning experience for my students.

I've received feedback from international students who appreciated the added accessibility.

e). AI Lesson Writing Assistant

Lesson: Writing High-Quality Content

Text and images block

Normal **B** *I* U

2. Keyword Stuffing

While keywords are important, stuffing them into your content too much can backfire. This is called keyword stuffing, and search engines don't like it. Your content should read naturally. Instead of repeating the same keyword over and over, use related terms and phrases. This makes your content more enjoyable to read and helps with SEO.

3. Poor Quality Content

Search engines favor high-quality content. If your articles are full of errors, boring, or not useful, people won't stick around. Aim to provide value in every post. Write clear, well-structured content that answers your readers' questions. Also, make sure your grammar and spelling are on point.

>

Writing content for your website? Don't let common SEO mistakes hold you back! This topic will show you the simple steps to avoid pitfalls like using the wrong keywords, overstuffing keywords, and ignoring quality. You'll learn how to

Max 600 characters (426 / 600)

Advanced settings

Generate

Writer's block can be a significant obstacle when creating course content. Teachable's AI Lesson Writing Assistant helps overcome this by providing content suggestions and structure.

This tool, integrated into the text block, has made it easier for me to draft lessons and refine them, making the content creation process much more efficient.

Feature #2: Easy and Flexible Payments

Managing payments and ensuring an easy transaction process is crucial for any online business.

Teachable's payment features have simplified this aspect for me, allowing me to focus more on creating and less on administrative tasks.

a). Hassle-Free Payment Options

Teachable's flexible payment options have been a game-changer.

With Teachable, I can let my students pay using PayPal, Apple Pay, Google Pay, debit and credit cards, and even Buy Now Pay Later options.

This flexibility has made it easier for students to enroll and has significantly boosted my sales. I noticed a 20% increase in enrollment after offering these diverse payment options.

b). Get Paid When You Want

Teachable understands the diverse financial needs of course creators, which is why they offer flexible payout schedules.

Whether I need daily, weekly, or monthly payouts, Teachable has me covered. This feature helps me manage my cash flow and plan my business expenses well.

For instance, choosing weekly payouts helped me better align my marketing spending with incoming revenue.

c). Tax Worries? Not Here

Dealing with taxes used to be a headache, but not anymore.

Teachable calculates, collects, and remits sales taxes on my behalf, simplifying the process and saving me from additional accounting work.

This feature has been a huge relief and allows me to focus on what I love – creating and selling courses.

Feature #3: Increasing Sales and Marketing Efforts

Marketing and sales tools are vital for reaching more students and increasing revenue.

Teachable provides an array of features that have made my marketing efforts more effective and streamlined.

a). Subscription Success

One of my favorite features is the subscription pricing model.

This allows students to access my content as long as they continue to pay their fees, providing me with a steady stream of recurring revenue. It's a win-win situation – students get continuous learning, and I get reliable income.

Implementing this model led to a 30% increase in my monthly revenue, as many students preferred the ongoing learning option.

b). Bundling for Value

Teachable makes it easy to bundle courses, adding more value for students and increasing my sales.

Creating attractive packages that appeal to my audience has helped increase my earnings and provided comprehensive learning experiences.

c). Lead Magnets Magic

Building an audience is essential, and Teachable's lead magnet feature helps with that.

By giving away free content in exchange for contact details, I can gather leads and expand my email list. This strategy has been key to expanding my reach and setting up successful marketing campaigns.

d). Order Bumps and Upsells

Purchase Confirmation

Heading

Thanks for enrolling in this course!

Proceed to Course

[Convert to Upsell Offer](#)

☒ Customize Proceed to Course Button

Continue to Course >

☐ Customize Redirect URL

Set a custom redirect URL for this button. By default, they'll be taken to the enrolled course curriculum page.

Teachable allows me to offer additional products or services during checkout, known as order bumps.

This feature significantly increases my average order value by suggesting related courses or resources.

Upsells are also very easy, letting students make additional purchases with a single click after they've bought a course.

e). Coupons and Promotions

The image shows a 'New Coupon' form with the following fields and options:

- Coupon Type:** A dropdown menu with 'Dollar Amount' and 'Percentage' (selected) options. A text input field next to it contains 'e.g. 50'.
- Pricing Plan:** A dropdown menu with 'Basic Plan' selected.
- Coupon Code:** A text input field with the placeholder text 'For usage, e.g. HALFOFF'.
- Internal Name:** A text input field with the placeholder text 'For internal reference, e.g. January Promo'.
- Expires:** A date picker field.
- Number Available:** A text input field with the value '10000' and a spinner control.
- Submit Button:** A green button labeled 'Add Coupon'.

Creating a sense of urgency and increasing transaction value can be achieved with coupons.

Teachable allows you to generate and manage coupons easily, providing incentives for students to purchase your courses. This feature has proven effective in boosting my sales during promotions.

During my last Black Friday sale, the use of coupons doubled my usual monthly sales.

Feature #4: Creating a Thriving Community

Being part of a supportive community and having access to educational resources can significantly impact your success.

Teachable offers several features that foster a strong creator community and provide ongoing support.

14 Course Bundle

Teachable offers a library of mini-courses packed with strategies to build and grow an online business. These courses have helped me learn a lot and use smart techniques in my own business.

It's really important for creators to take courses from other creators too. When you learn from others, you get new ideas and tips. This keeps you updated with what's working well.

You can see what successful creators do and try those things yourself. Learning from others can make you better and help your business grow even more.

b). Supportive Creator Community at Teachable

Being part of Teachable has connected me with over 10,000 creators. This community has been fantastic for networking, trading ideas, and getting support.

It's like having a team of cheerleaders who understand the challenges and victories of online course creation. The feedback and tips I received helped me improve my course content significantly.

c). Product Webinars for Deep Dives

Teachable's product webinars offer in-depth guides to new features and sneak peeks at what's coming next.

These webinars have provided valuable insights and helped me make the most of the platform's capabilities.

d). Launch Accelerator Challenge

Welcome to the Challenge

Welcome to the Launch Accelerator Challenge.

Let's get started.

Welcome to the Launch Accelerator Challenge. Let's get started.

At Teachable, our goal is to help you build a more impactful business through courses, coaching, and downloadable content. And we offer not only the platform, but also the training and support resources to get you there.

To that end, Launch Accelerator is designed to guide you along as you set up your school and course, build an engaging curriculum your students will love, and actually launch your own online course in 30 days (or less).

Here's a quick look at how we'll run the challenge:

Four modules

The challenge is broken up into four modules. Each module has specific objectives for you to achieve and resources to help you along the way.

Help Center

If you ever have questions about how to use our platform, consult [Teachable's Help Center](#) for step-by-step articles on how to use Teachable, as well as answers to common questions.

Although I haven't had a chance to use Teachable's Launch Accelerator Challenge, yet, I have heard many great things.

Launched just last year, this program has been a game-changer for many creators. It guides users through the process of getting their courses up and running in just 30 days.

The expert advice and structured approach have been incredibly helpful for others, allowing them to launch ahead of schedule and see immediate enrollments.

It's definitely something I'm considering for my next course!

e). Teachable for Every Sale

Teachable celebrates every sale I make, offering greater access and benefits as I move up the ranks.

This feature has been a great motivator and has added an extra layer of excitement to my sales achievements.

The rewards program encouraged me to reach higher sales targets, which I did consistently.

f). Live Chat for Quick Help

When I have questions, live chat support is available to help.

Available for Pro, Pro+, and Business plans, this feature provides fast answers to pressing questions, ensuring I can resolve issues quickly and keep my business running without any problems.

Feature #5: Detailed Analytics & Reporting

Knowing how students engage with my courses and tracking financial performance is important for the continuous improvement of my business.

Teachable's analytics and reporting tools provide the insights I need.

a). Insightful Course Reports

Teachable's course reports provide stats on lecture and video completion, quiz scores, and course leaderboards. This data helps me gauge student engagement and identify areas for improvement.

By analyzing these reports, I made adjustments that led to higher completion rates and better student feedback.

b). Comprehensive Sales Reports

Teachable's sales reports allow me to monitor total sales, earnings, refunds, chargebacks, affiliate commissions, and payouts. These reports give me a clear picture of my business's financial health.

c). Student Progress Tracking

Knowing how my students progress through my courses helps me support them better.

Teachable's student progress reports provide data on lesson completion, video viewing, and quiz scores, helping me identify where students might need additional support.

By focusing on these areas, I was able to offer targeted help and improve overall course satisfaction.

d). Easy Integrations

Teachable integrates with apps like [Google Analytics 4](#), [Google Tag Manager](#), and [Hotjar](#). These tools show me how students use my courses and school.

With this information, I can make data-driven choices to make the learning experience even better.

Feature #6: Advanced Tools for Experienced Creators

For those looking to take their course creation to the next level, Teachable offers advanced tools that provide greater control and customization.

a). Effortless Integrations

Teachable's integrations, including [Zapier](#), allow me to connect with the tools I already use and love. This makes my work easier and helps my business run smoothly.

b). Powerful Public API

For more advanced needs, Teachable's public API lets me automate managing students and products, create detailed reports, and connect with other tools. This helps me run my online business more efficiently.

c). Customizing My Theme

Advanced theme customizations enable me to ensure my school and products are 100% on-brand. With code snippets and custom CSS, I can remove Teachable branding and create a truly unique site.

d). Tailored User Roles

Managing a team is easier with Teachable's custom user roles. I can control what users can and can't do in my school, ensuring collaborators have the access they need without compromising sensitive information.

e). Bulk Student Imports

Adding students one by one can be tedious. With Teachable's bulk student import feature, available on the Business plan, I can save time by importing students in bulk, making course management much more efficient.

Whether you're just starting out or looking to scale your online school, Teachable offers the tools and support you need to succeed.

The Good and Bad Sides of Using Teachable

Alright, let's get real about Teachable. It's been a big part of my journey in creating and selling online courses.

But like anything, it's got its highs and lows.

Here's my take on the good and bad sides of using Teachable based on my own experience and what others have shared.

The Good

1). User-Friendly Interface

Teachable is really easy to use. You don't need to be a tech expert. The drag-and-drop builder makes creating your course pages simple and fun.

When I started, it was like playing with digital Legos! No stress about coding or anything like that.

2). Course Completion Certificates

Everyone loves a little recognition. Teachable make it easy to create and give out course completion certificates.

My students love getting these certificates. It's a great way to motivate them and give them something to show for their hard work.

3). Easy for Students

Teachable isn't just easy for me; it's also super user-friendly for my students. They can easily find their way through courses, quizzes, and materials.

I've had so much positive feedback about how straightforward the platform is to use.

4). Reliable Hosting

Imagine your videos buffering in the middle of a lesson. Nightmare, right?

Thankfully, Teachable offers reliable hosting with high-quality playback on various devices. My students can watch videos smoothly without any interruptions, keeping them engaged and happy.

5). Community Building Features

Building a community around your courses can really enhance the learning experience.

Teachable's features, like discussion forums, comment sections, and live Q&A sessions, have helped me create a sense of community among my students. This has not only improved engagement but also made learning more interactive and fun.

6). Regular Updates and Improvements

Teachable is always getting better. They often release updates and new features to make the user experience better. Every update feels like an upgrade to my business tools.

Other pros include AI-powered tools for easy course creation, great customer service, increased sales and marketing efforts, thriving community support, detailed analytics and reporting, and many more.

The Bad

1). Limited Customization Options

While Teachable does offer customization, it can be somewhat limited. For instance, fully customizing email templates and landing pages to match your brand isn't as extensive as I'd like.

This can make it tough to maintain a consistent brand experience across all touchpoints.

2). Transaction Fees

Teachable charges transaction fees on all sales, which can add up over time. Depending on the plan, these fees can range from 5% to 0%.

While this might not seem like much initially, it can significantly impact your profits, especially if you're selling a lot of courses.

3). Downtime and Maintenance

Like any large platform, Teachable experiences occasional downtime for maintenance.

While these times are typically scheduled during off-peak hours, they can still be inconvenient if you have a global audience.

I've had instances where students in different time zones couldn't access their courses, which was frustrating.

4). Limited Course Types

Teachable is primarily designed for video-based courses.

While you can add other types of content, like quizzes and surveys, the platform doesn't support as many different types of educational content as some other platforms. This can be a limitation if you want to offer a more diverse range of learning materials.

5). Limited Reporting

The reporting tools on Teachable, while useful, are somewhat limited. For instance, you can't track the performance of individual emails or landing pages in great detail.

This makes it harder to analyze and optimize your marketing campaigns. However, integrating Teachable with third-party analytics tools like Google Analytics can help mitigate this issue.

Overall, despite its few cons, I've found Teachable to be a valuable tool in my journey as a course creator. Its strengths far outweigh the weaknesses, and it has helped me grow my online business.

Still not sure which plan is right for you?

Take our pricing quiz to determine which plan best fits your needs

Take the quiz

Let's talk about [Teachable plans and pricing](#). If you're thinking about setting up your own online school, it's super important to know what each plan costs and what you get.

I've been through it all, so let me break it down for you in a way that's easy to understand.

1). Free Plan

Cost: \$0/month

What You Get:

- 1 Published Product: Whether it's a course, coaching service, or digital download, you can launch one product.
- No-Code Course Builder: Create your course website and landing page without any coding skills.
- Student Referrals: Encourage your students to refer others to your courses.
- Teachable:pay: Integrated payment processing is used to handle transactions.
- Admin & Author Seat: You can manage everything yourself or with one additional person.

Personal Take: *The Free Plan is a fantastic starting point if you're just starting with online courses. However, keep in mind that there's a \$1 + 10% transaction fee on paid courses. It's great for testing the waters, but you might quickly outgrow it if your courses gain traction.*

2). Basic Plan

Cost: \$59/month

What You Get:

- 5% Transaction Fee: Lower than the free plan but still something to consider.
- 5 Published Products: Launch more courses, coaching services, or digital products.
- Community: Build a community around your courses.
- Integrated Email Marketing: Engage with your students directly through Teachable's email system.
- Coupons and Order Bumps: Offer discounts and additional products during checkout to increase sales.
- Custom Domains: Use your own domain name to brand your online school.
- Live Group Coaching and Accelerator Challenge Access: Extra resources to help you grow.

Personal Take: *The Basic Plan is where you start to get serious. I upgraded to this plan when I had a few courses ready to go. The lower transaction fee and additional products were a big plus. The email marketing tool also helped me keep in touch with my students and drive more sales.*

3). Pro Plan

Cost: \$159/month

What You Get:

- 0% Transaction Fees: No transaction fees, which means more money in your pocket.
- 50 Published Products: Plenty of room to grow your course library.
- Unlimited Membership Tiers: Create different membership levels for your students.
- Affiliate Marketing: Leverage others to promote your courses for a commission.
- Live Chat Support: Get quick help when you need it.
- Upsells to Increase Order Value: Offer additional products or services during checkout.

- Public API Access: This is for those who need more customization.
- Removable Branding: Make your site look more professional by removing Teachable's branding.
- 5 Admin & Author Seats: Great for small teams.

Personal Take: *The Pro Plan is a solid choice if you're serious about scaling your online school. I loved the zero transaction fees and the ability to launch up to 50 products. Live chat support was a lifesaver more than once when I ran into technical issues.*

4). Pro+ Plan

Cost: \$249/month

What You Get:

- *Everything in the Pro Plan, plus:*
- 200 Courses, Coaching Products, and Digital Downloads: A huge library capacity for diverse offerings.
- Custom User Roles: Manage your team with tailored access levels.
- 200 Product Bundles: Package multiple products together to offer more value.

Personal Take: *The Pro+ Plan is for those who are really looking to expand and need a lot of room for growth. The custom user roles are particularly useful if you have a larger team and need to control who can access what.*

4). Business Plan

Cost: \$665/month (Billed Annually)

What You Get:

- Unlimited Courses, Coaching Products, and Digital Downloads: No limits on what you can offer.
- Unlimited Admin & Author Seats: Perfect for larger teams.
- Advanced Theme Customizations: Get full control over the look and feel of your site.
- Bulk Student Enrollment: Efficiently manage large enrollments.
- Custom User Roles: Further manage team access and responsibilities.

Personal Take: *The Business Plan is the big league. If you're running a large operation with a significant number of courses and a big team, this plan makes sense. The advanced customizations and bulk enrollments are key features for scaling up your operations.*

So, there you have it – a breakdown of Teachable pricing. Each plan offers different features tailored to varying needs.

Whether you're just starting with a single course or looking to scale a large online school, Teachable has a plan that can fit your needs.

Remember, it's all about finding the right balance between cost and features that works for you.

How to Set Up Your First Online Course on Teachable

When I set up my first course on Teachable, I followed these exact steps. I remember how exciting it was to see my course live and to get the first few enrollments.

Using Teachable's built-in email marketing, I was able to reach out to potential students and increase my course sales significantly.

Setting up your first online course on Teachable might seem a bit overwhelming at first, but trust me, it's pretty straightforward once you get the hang of it.

I created another account on the free plan to show you how to get through each stage.

Let's walk through the steps together so you can get your course up and running in no time.

Step 1: Create Your Teachable Account

First things first, you need to sign up for a [Teachable account](#).

Head over to Teachable and sign up. You can start with the free plan, which is perfect for beginners. Just fill in your details, and you're good to go!

Get started with Teachable

Join more than 100,000 creators who've sold over **\$1 billion** in courses and coaching.

How to Avoid Common SEO Mistakes in Content Writing

Describe your course

When writing content for your website, making mistakes can hurt your chances of ranking high on search engines. This topic will cover common errors people make with SEO and how to avoid them. You'll learn about the importance of choosing the right keywords, avoiding keyword stuffing, writing high-quality content, using proper headings, and making sure your content is mobile-friendly. By understanding these common mistakes, you can improve your content and boost your website's visibility on search engines.

Add a Thumbnail Image: Upload a thumbnail image for your course. This image will be displayed at checkout and throughout the member experience. You can upload one now or choose one later.

Add a thumbnail image

The thumbnail is displayed at checkout and throughout the member experience. Upload one now or choose one later.

 Upload an image Aspect ratio: 16:9 Recommended size: 1024x576 Use the upload area to double-check your image.  Upload	I don't have one Skip this step for now, I will add it later
--	--

Set a Price: Choose a pricing model for your course. Options include one-time purchase, payment plan, subscription, and free. Set the price that reflects the value of your course.

Set a price

You can always change this later.

One time purchase

Your customer pays once

Payment plan

Set a fixed number of monthly payments

Subscription

Set up recurring payments

Free

Allow access to your content free of charge

I don't know yet

Skip this step for now, I will add it later

Outline Your Course: Decide whether to generate your course outline with AI or start from scratch. This outline will help you structure your course curriculum well.

Outline your course

Choose a method below to create your course curriculum.

Generate with AI

Describe your course below and we'll generate an outline for you.

Describe your course

When writing content for your website, making mistakes can hurt your chances of ranking high on search engines. This topic will cover common errors people make with SEO and how to avoid them. You'll learn about the importance of choosing the right keywords, avoiding keyword stuffing, writing high-quality content, using proper headings, and making sure your content is mobile-friendly. By understanding these common mistakes, you can improve your content and boost your website's visibility on search engines.

Start from scratch

I will create my own outline.

Step 4: Build Your Curriculum

This is where the fun begins. You'll start adding your course content.

Create Sections and Lectures:

- Click on "*Curriculum*" in the course editor.
- Click "*New Section*" to add a section (like a module).
- Click "*Add New Lecture*" to add lectures (individual lessons) within each section.

Upload Content:

- Video: Upload your course videos (recommended format is MP4).
- Text: Add written content directly or upload documents.
- Quizzes: Add quizzes to engage your students and test their knowledge.
- PDFs: Upload supplementary PDFs.

Organize Your Content: Drag and drop your lectures to organize them in the desired order.

Step 5: Customize Your Course Pages

You want your course to look professional and engaging. Here's how you can do it:

Edit the Sales Page: Click on “*Sales Pages*” in the left-hand menu. Customize your sales page with compelling text, images, and a promo video to attract and inform potential students. Make sure to highlight the benefits of your course and include a clear call to action.

Set Up the Checkout Page: Ensure the checkout process is smooth and easy to follow. Personalize the checkout page to fit your brand. You can add additional fields to collect necessary information from your students.

Demonstrate social proof to increase sales conversion. Add up to two testimonials.

Reinforce your course's value proposition to close the sale. Add up to five bullet points.

Offer prospective students a money-back guarantee to remove the barrier to purchase.

Customize the Thank You Page: After students purchase your course, they should be directed to a thank you page or the course curriculum. This page can include a thank you message, instructions on how to access the course, and any additional information they might need.

Default Post Purchase Page: Specify where a student should be taken after buying this course. Typically, this would be the Thank You Page.

Step 6: Set Your Pricing

Teachable offers several pricing options to fit your needs and the needs of your students. Here's how to set it up:

Go to Pricing: In the course editor, click on the “Pricing” tab.

- Choose a Pricing Model: You have four main options to choose from:
- Free: Allow access to your content free of charge. This is great for lead magnets or introductory courses.
- One-time Purchase: Set a one-time payment for lifetime access to your course.
- Payment Plan: Offer a fixed number of monthly payments. This makes higher-priced courses more accessible.
- Subscription: Set up recurring payments. This is ideal for ongoing access to content, such as memberships or continuous education.

Set the Price: Enter the price that you want to charge for your course. Make sure it reflects the value of the content you're offering. Consider your audience's budget and compare it with competitors' pricing. Here are some examples of pricing models:

The screenshot displays a course pricing interface. On the left is a dark sidebar with navigation icons and labels: 'How to Avoid Common SEO Mistakes in...', 'Setup guide', 'Curriculum', 'Design templates', 'Certificates', 'Information', 'Design templates', 'Certificates', 'Information', 'Design templates', 'Certificates', and 'Information'. The main content area is titled 'One-time purchase' and includes the text 'Students can fully access your product by paying a one-time amount.' Below this, there are input fields for 'Price' (set to USD 99), 'Name' (set to 'How to Avoid Common SEO Mistakes in Content Writing'), and 'Subtitle' (set to 'Fix SEO Mistakes Fast'). A 'Detailed Description' section contains a rich text editor with the text: 'Join this course to learn how to spot and fix common SEO mistakes that can hurt your website's ranking. We'll show you how to choose the right keywords, write great content, and make your site easy to use on any device. By the end, you'll know how to improve your site's visibility and get more visitors. Boost your SEO skills and watch your traffic grow!' To the right of the description is a preview box showing the course title, subtitle, and a 'Less' link. On the far right, a dark sidebar contains a green button labeled 'Add Pricing Plan'.

- Free: Great for introductory lessons or lead magnets.
- One-time Purchase: \$99 for full access to "**How to Avoid Common SEO Mistakes in Content Writing.**"
- Payment Plan: \$35/month for 3 months for access to the course.
- Subscription: \$20/month for ongoing access to SEO content and updates.

Setting the right price is a balance between covering your costs, compensating your time and effort, and being accessible to your target audience.

Once you've decided on the pricing model and amount, click "Save" to apply these settings.

Step 7: Publish Your Course

The screenshot shows the Teachable Curriculum interface. On the left is a dark sidebar with navigation icons and labels: Setup guide, Curriculum, Design templates, Certificates, Information, Pricing, Sales pages, Embed, Sales pages, Embed, Sales pages, Embed, Coupons, Upsell funnel, Comments, Sales pages, Embed, Coupons, and Upsell funnel. The main content area is titled 'Curriculum' and shows a course titled 'How to Avoid Common SEO Mistakes in Content Writing'. Below the title is a 'Bulk edit' button. The curriculum is organized into sections: 'Getting Started' and 'Keywords'. The 'Getting Started' section contains two lessons: 'What is SEO?' and 'Common SEO Mistakes'. Each lesson has a 'Drip' button, a 'Quick actions' dropdown, and a 'Publish' button. A red arrow points to the 'Preview' button at the top right of the curriculum page. Another red arrow points to the 'Publish' button for the 'Common SEO Mistakes' lesson. At the bottom of each section, there are icons for 'New lesson', 'Bulk upload', and 'Section summary'.

You've put in all the hard work creating your course, and now it's time to make it available to your students.

Publishing your course on Teachable is the final step to getting your content out there.

Preview Your Course: Before you publish, it's a good idea to preview your course to ensure everything looks perfect. Click the "*Preview*" button at the top right of your curriculum page to see your course, as your students will see it.

Publish Each Section and Lecture: Go through each section and lecture in your course curriculum and click the "*Publish*" button next to them. This makes each piece of content available to your students.

Final Review: Double-check that all your content is correctly uploaded, organized, and published. Ensure that any quizzes, PDFs, and videos are functioning properly. Verify that your course description, thumbnail, and pricing are set up the way you want.

Publish Your Course: Once you're confident everything is in place, click the "*Publish*" button for your entire course. This will make your course live and available for enrollment.

Step 8: Promote Your Course

Now that your course is live, it's time to attract students. Here's how to get the word out:

Use Social Media: Share your course on platforms like Facebook, Twitter, LinkedIn, and Instagram. Create posts that show why your course is valuable and include a direct link.

Email Marketing: Send out different emails to your subscribers to tell them about your new course. Share exciting details about what they'll learn and why they should join.

SEO: Improve your course pages for search engines to get more visitors. Use keywords in your course title, description, and content to boost your search engine ranking.

Limited-Time Discounts: Offer a temporary discount or special bonus to encourage early sign-ups.

Gather Testimonials: Encourage your first group of students to provide testimonials and reviews. Positive feedback can be incredibly powerful in attracting new students.

Step 9: Engage with Your Students

Interaction is key to a successful online course. Engaging with your students keeps them motivated and enhances their learning experience.

Enable Comments: Allow students to leave comments on lectures. This encourages interaction and provides a platform for students to ask questions and share insights.

Live Q&A: Host live sessions to answer questions and engage with students in real time. This can be done through webinars or live chats.

Track Progress: Use Teachable's analytics to monitor student progress. Identify areas where students may be struggling and make necessary improvements to your course content.

Setting up your first online course on this learning management system might feel a bit overwhelming at first, but don't worry—it's easier than you think.

Just follow these steps, and you'll have your course up and running in no time.

Teachable Showdown: Comparing Top Learning Platforms

Making and selling online courses is a great way to share what you know and make money.

I've used Teachable, Udemy, Kajabi, and Thinkific, and I'm here to share my experiences to help you pick the best one.

1). Teachable vs. [Udemy](#)

Teachable:

- **Ownership and Control:** Teachable lets you have full control over your content, pricing, and student data. You can customize your course pages and brand them to match your style.
- **Revenue Model:** Teachable's professional and business plans allow you to keep most of your earnings minus a small transaction fee on lower-tier plans.
- **Course Creation Tools:** The drag-and-drop builder is super user-friendly. I could easily upload videos, create quizzes, and add PDFs without hassle.

Udemy:

- **Marketplace Model:** Udemy brings a large audience to your courses, but you have less control over pricing and promotions because Udemy runs frequent sales.
- **Revenue Sharing:** Udemy takes a significant cut from your sales. It's great for exposure but not so much for making much profit.
- **Course Creation Tools:** Udemy's tools are straightforward but less customizable compared to Teachable. They're designed to get you started quickly but can feel limiting if you want more control over your course content.

***Personal Insight:** If you want more control and higher revenue share, Teachable is the way to go. If you're looking for easy exposure with less effort on marketing, Udemy can be beneficial.*

2). Teachable vs. [Kajabi](#)

Teachable:

- **Flexibility:** Teachable offers flexibility with different pricing models, including one-time payments, subscriptions, and payment plans. This helped me tailor my pricing strategy to different audience segments.
- **Ease of Use:** It's straightforward and perfect for focusing on content creation without being bogged down by complex settings.
- **Professional and Business Plans:** These plans offer advanced features like affiliate marketing and detailed analytics, which are fantastic for scaling your business.

Kajabi:

- **All-in-One Solution:** Kajabi is an all-in-one platform. It's like having a course builder, email marketing tool, and website builder all in one place. This was fantastic for scaling my business.
- **Advanced Marketing Tools:** Kajabi's marketing features are top-notch. Automated email sequences, sales funnels, and detailed analytics helped me streamline my marketing efforts.
- **Higher Cost:** The downside? It's pricey. Kajabi's cost can be a barrier if you're just starting out. I found it worth the investment as my business grew, but it's a big upfront commitment.

***Personal Insight:** If you're looking for an integrated solution and have the budget, Kajabi's advanced features can take your business to the next level. For simpler, cost-effective course creation, Teachable is a solid choice.*

3). Teachable vs. [Thinkific](#)

Teachable:

- **Transaction Fees:** Teachable's free and basic plans come with transaction fees, which are eliminated in the higher-tier plans.
- **Course Builder:** The course builder is easy to use, but it doesn't offer all the advanced customization options that Thinkific offers.

Thinkific:

- **No Transaction Fees:** Thinkific doesn't charge transaction fees, even on their free plan. This was a huge plus when I was starting out.

- **Course Builder:** Thinkific's course builder is highly intuitive and allows more advanced design options. The drag-and-drop functionality is similar to Teachable but with more flexibility.
- **Customization and Community:** Thinkific offers better tools for community building, including forums and discussion features. This was great for engaging students beyond the course content.

***Personal Insight:** Thinkific's no transaction fees and advanced customization make it attractive, especially if you want to build a community around your course. Teachable's simplicity and ease of use make it a great starting point.*

From my experience:

- **Teachable** is great if you want to have control over your course content and pricing without needing to learn too much tech stuff.
- **Udemy** is perfect for quickly getting your course in front of a big audience, but you'll have to give up a chunk of your earnings.
- **Kajabi** is awesome if you want everything in one place, including advanced marketing tools, but be ready to spend more upfront.
- **Thinkific** is fantastic for those who want lots of customization and community-building features without having to pay transaction fees. It's perfect for growing your brand.

Pick the platform that fits what you need and want. Each one has its own strengths, so knowing what they offer can help you make the right choice.

So, is Teachable worth it?

Absolutely, yes!

Teachable is a fantastic choice for launching online courses. It's user-friendly, packed with powerful features, and offers excellent support.

Whether you're just starting or have been teaching online for a while, Teachable has something for you.

I've found it incredibly easy to customize and manage my courses on Teachable. The minimal transaction fees on higher plans mean I get to keep more of my earnings.

Teachable's drag-and-drop course builder makes it easy to create professional courses without any tech headaches.

Flexible payment options like PayPal and Apple Pay make it simple for students to pay, increasing your sales.

The platform's AI tools save you time and enhance course creation. Marketing tools help you reach a wider audience and grow your revenue.

You'll also benefit from a supportive creator community and detailed analytics to track progress and performance.

If you're ready to create and sell courses without stress, Teachable is definitely worth trying.

Sign up for Teachable today and start your journey to success!
